

Tactical Operations Centers (TOCs)

MISSION

To develop and field operationally effective, affordable, and supportable integrated, digitized Tactical Operations Centers (TOCs) which meet the functional information requirements of commanders and staffs at all echelons of command.

DESCRIPTION AND SPECIFICATIONS

TOCs incorporate Army Battle Command Systems (ABCSs), standard vehicles, shelters and tentage, and are transportable in military aircraft. TOCs are digitized, tactically mobile, and fully integrated. Military off-the-shelf (MOTS), non-developmental items (NDI), commercial off-the-shelf (COTS), and emerging technologies are incorporated, and the TOCs are Defense Information Infrastructure/Common Operating Environment (DII/COE) and Joint Technical Architecture (JTA) compliant. TOCs are interoperable across all Army mission areas and joint/allied command and control nodes, and provide a common operational picture to the warfighter. TOCs are also modular and provide a “jump” or split-based capability. Operations are revolutionized through a combination of state-of-the-art data processing, communications, and information transport methods, using the tactical internet and the latest networking capabilities. Information dominance is achieved through the orderly evolution of capabilities that were demonstrated during Advanced Warfighting Experiments. These include collaborative planning, improved large screen displays, new data radios and the tactical internet.

FOREIGN COUNTERPART

No known foreign counterpart
